DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 13-21 in Paper No. 7 is acknowledged.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: In Figure 1, item "47". In Figure 2, item "59". In Figure 3, items "59" and "61". In Figure 5, item "S204". A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: On page 8 line 23, item "61A". On page 9 line 3, item "(θ)". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3724

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 6-7 rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe et al.

Watanabe et al. discloses the same invention including an apparatus of estimating a lifetime of a cutter (Abstract), a detector for detecting a value of a parameter (Column 7 lines 28-30), a comparator (62), an output element (Column 7 lines 21-28), that the comparator determines if the cutter is unfit for use (Column 7 lines 28-30), and that the comparator is in a microcomputer (Fig. 6).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-5 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al. in view of Iwasaki. Watanabe et al. discloses the invention including a motor driving the cutter (8) {rest listed above} but fails to disclose that the parameters detected are a value of current loaded in the motor and/or the time required to complete the task, and that ammeter and timer element are used to measure the respective parameters. Iwasaki teaches the use of detecting the value of current loaded in the motor parameter and the time required to complete the task parameter (Column 1 lines 19-27). Examiner notes that current is measured in amps and a ammeter is used

Art Unit: 3724

to measure amps therefore it is inherent that an ammeter would be present. Also, it is inherent that a timekeeper be used to measure the time parameter. Therefore, it would have been obvious to one skilled in the art, at the time of the invention, to have provided Watanabe et al. with a current load and time detector for an alternate method of detecting wear.

8. Claims 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al. The Examiner take official notice in that the output element comprises of a visual display is old and well known in the art.

In light of Watanabe et al. and Iwasaki, the method is inherent.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smith, Lipcon et al., Maxey et al., Matossian et al., Mattinger et al. ('166), Mattinger et al. ('831), Klosterman, and Tanaka et al.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is 703-605-4287. The examiner can normally be reached on 7:30-5:00, Mon - (every other) Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allen N. Shoap can be reached on 703-308-1082. In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
